- Weight: 19.8 lbs
- Electric: Class 1, Type B
- LCD Touchscreen: 7"
- Cold Temp Adjustable: -8C
- Hot Temp Adjustable: +41C

Treatment types

SHAPE

By heating then cooling target areas, Shape treatments stimulate the body's natural processes, promoting a more toned appearance and a tighter physique.

TONE

Tone treatments use cold massage to smooth, lift, and firm skin, reducing the appearance of imperfections and improving the skin's overall texture and appearance.

FACIAL

Facial treatments use cold temperatures to naturally promote a brighter, more toned and lifted appearance. NeveSkin™ Classic Facials are a natural, non-invasive way to look younger and more radiant.
